CAREER OBJECTIVE:

Aim to be associated with progressive organization which offers an excellent atmosphere to prove myself by utilizing all technical knowledge into practice and profit myself with experience and valuable knowledge for the development and growth of the organization.

SKILLS:

- Programming Skills: Python, Java
- Web Technologies: HTML, CSS, JavaScript, React Js
- Database: MySQL

PROJECTS:

1. **Portfolio Website - Personal**

- Designed and developed a responsive portfolio website using React JS, HTML, CSS, and JavaScript to showcase projects, skills, and contact information.
- Implemented navigation, project previews, and enhancing user experience and demonstrating frontend development skills.

2. **News App – Top Headlines**

- Built a dynamic news app using React JS that fetches and displays top headlines using a public news API, with category-wise filtering and responsive UI.
- Implemented routing, state management, and loading indicators to provide a seamless user experience across different news sections.

3. **Event Management System**

- Developed a full-stack Event Management System using React JS (frontend), Python (backend), and MySQL (database) to manage user registration, event creation, and admin controls.
- Integrated with event handling features, ensuring secure access and dynamic interaction between users and event data.
